

Notes: It is of course incumbent upon individuals to undertake their own due diligence when selecting a trades person/business but this might help as a starting place.

It would be extremely helpful if you could provide further names as and when you use a trade and wish to recommend them...or not!

I'll do my best to keep the table updated as and when I get updates! Feel free to contact me via public forum or DM... or pigeon (there's plenty of them living here!)
